

## Tree Risk & Storm Preparedness Self-Assessment Tool

### Is Your Property Storm-Ready?

#### Questions (Each scored 0–4 points)

- Are any trees leaning noticeably or growing at an angle? (Yes +2)
- Have you noticed large dead branches or limbs? (Yes +3)
- Are there any mature trees on your property? (Yes +2)
- Are there trees with cracks, splits, or cavities in the trunk? (Yes +3)
- Are trees near your home, vehicles, or power lines? (Yes +2)
- Do you have older trees or shallow-rooted species on your property? (Yes +4)
- Have your trees been pruned or inspected within the last 2 years? (Yes - 4)
- Is your area prone to high winds, hurricanes, or heavy rain? (Yes +2)
- Have you experienced flooding or soil erosion around tree bases? (Yes +3)
- Do you see fungi, mushrooms, or signs of decay near tree roots or trunks? (Yes +3)
- Do you have storm history that's damaged trees before on your property? (Yes +3)

#### Results Section

- **0–5 Points: *Low Risk***  
“Great! Your trees seem healthy, but we still recommend a routine inspection every few years.”
- **6–10 Points: *Moderate Risk***  
“Your property may be vulnerable to storm damage. Book a storm-prep inspection today.”
- **11+ Points: *High Risk***  
“There’s a strong chance your trees are at risk. Contact us immediately for an emergency prep consultation.”
